

The text of the amendment is arranged to show deleted text, new or amended text as shown below:

- deleted text is ~~struck through~~;
- new or amended text is highlighted/shaded in grey;
- an ellipsis '[...]' indicates that the rest of the text is unchanged.

Appendix I — Aircraft Type Ratings for Part-66 Aircraft Maintenance Licences

The following aircraft type ratings should be used to ensure a common standard throughout the Member States.

~~The inclusion of an aircraft type in the licence does not indicate that the aircraft type has been granted a type certificate under the Regulation (EC) No 216/2008 and its Implementing Rules; this list is only intended for maintenance purposes.~~

In order to keep this list up-to-date, in case a Member State needs to issue a type rating that is not included in this list, the information should be passed on to the Agency EASA using the EASA 'Contact us' webpage (<https://www.easa.europa.eu/contact-us>)

Notes on TR endorsement covering several models/variant:

The endorsement of a type rating (TR) on the aircraft maintenance license (AML), covering several models/variants, does not automatically imply that the AML holder has acquired the appropriate knowledge on each model/variant. The TR course received or the experience the AML holder has gained, may have been limited to one or several model(s)/variant(s) but not to all models/variants.

To demonstrate adequate competence on the relevant model(s)/variant(s), the AML holder and/or the maintenance organisation where the AML holder is contracted/employed, are responsible to verify whether the model/variant has been adequately covered by the TR course or gained experience.

Further explanation can be found in AMC 66.A.20(b) and AMC 145.A.35(a).

Notes on when the licenses should be modified:

When a modification is introduced by this Decision to an aircraft type rating or to an engine designation in the rating which affects licenses already issued, the ratings on the ~~Aircraft Maintenance Licences (AMLs)~~ may be modified at the next renewal or when the licence is reissued, unless there is an urgent reason to modify the licence.

Notes on aircraft modified by Supplemental Type Certificate (STC):

- This Appendix I intends to include the type ratings of aircraft resulting from STCs for installation of another engine. These STCs are those approved by the Agency EASA and those approved by the Member States before 2003 and grandfathered by the Agency EASA. Other STCs than those for engines are not considered.
 - Example: The STC from JET AVIATION AG, approved by the LBA for replacement of GE CF 700 by Honeywell TFE731 on Fan Jet Falcon Series E, results in a new rating called 'Falcon 20E (Honeywell TFE731)'.

- However, the ratings from STCs for installation of an engine:
 - on part of the original airframe models, or
 - from the same manufacturer, but of a type very similar to the original one,
 have not been added because they would have resulted in an already existing rating.

Examples:

- The STC from SILVERHAWK CONVERSIONS approved by EASA for installation of PT6A-135A on Beech C90, C90A and E90 would result in the Beech C90/C90A/E90 (PWC PT6) rating, but this is not listed because it is already included in the original Beech 90 Series (PWC PT6) rating.
 - The STC from Air-Service Wildgruber GmbH approved by LBA for replacement of PWC PT6A-20 by PWC PT6A-27 would result in the De Havilland DHC-6-100 (PWC PT6) rating, but this is not listed because it is already included in the De Havilland DHC-6 (PWC PT6) rating in the table.
- ~~At the time of publication of this Decision, The Agency EASA~~ has not received all the information concerning STCs that have been previously approved by the Member States. As a result, not all STCs are considered by this publication.
 - When the STC concerns the installation of an engine that falls under a different subcategory, e.g. replacement of a piston engine by a turbo-prop (a turbine engine), then the new type rating needs to be listed in the new subcategory.
 - In case a type rating resulting from an STC has not been yet defined by the Agency, the latter shall be contacted by the competent authority to agree on a new type rating to be used.

In the following tables:

- The column 'TC Holder' includes the TC holder as defined in the ~~T~~ype ~~C~~ertificate ~~D~~ata ~~S~~heets (TCDS) (EASA, FAA or other) or the Specific Airworthiness Specifications (SAS).
- The column '~~STC Holder~~' includes the STC holder as defined in the ~~S~~upplemental ~~T~~ype ~~C~~ertificate ~~D~~ata ~~S~~heets (STCDS) (EASA, FAA or other).
- Some TC holders' designations have been corrected to add the information: 'Aircraft with an SAS', this means that the aircraft listed under this TC holder designation is considered an 'orphan aircraft'.
- In Group 3, ~~the column 'Type of structure', a third column has been added which is called 'Type of structure' and~~ intends to assist the competent authorities in identifying the experience required for this type with a view on removing existing limitations on the licence.
- Wooden structure covered with fabric is considered to fall under wooden structure. For aeroplanes with a combination of structures, e.g. metal tubing fuselage and wooden wings, both experiences 'metal tube covered with fabric' and 'wooden structure' are required.
- In Group 3, ~~the column 'MTOM' fourth column has been added which is called 'MTOM' and which~~ intends to assist the competent authorities in identifying the aeroplanes types where the ~~M~~aximum ~~T~~ake-~~O~~ff ~~M~~ass (MTOM) is:
 - above 2T and is subject to a B1.2 licence, or
 - 2T and below and is subject to a B1.2 or B3 licence.
- The column 'NOTE' in every table includes some necessary information, when relevant, e.g.:

- 'OSD Approved' or 'Pending OSD Approval' means that an OSD-MCS (operational suitability data for maintenance certifying staff) exists or is still under the approval process at the date of publication of this ED Decision. OSD data is owned by the TCH (see TCHs contact list: <https://www.easa.europa.eu/document-library/operational-suitability-data/osd-contact-list>).

Type training courses approved before the approval of the OSD-MCS, shall include the OSD elements within two years after the OSD-MCS approval.

- 'TC no longer valid' means that the type certificate has been either revoked or surrendered. TR endorsement should be removed from the AML at the next renewal, or can be kept in the AML at the discretion of the Competent Authority
- 'TC not yet released' means that the type certificate has not yet been released by EASA at the date of publication of this ED Decision.
